

WJ_WifiManager:

WJ WifiManager is an android app to check WIFI signal strength. In this app, user can self- define Good, Fair, and Poor WIFI signal range. With the definition of these ranges, the app will provide users the dynamic chart and dynamic radar- like panel of all the associated WIFI. Also, this app also can make a warning when the signal strength of he WIFI which is connected to is down to the bad range which is user define.

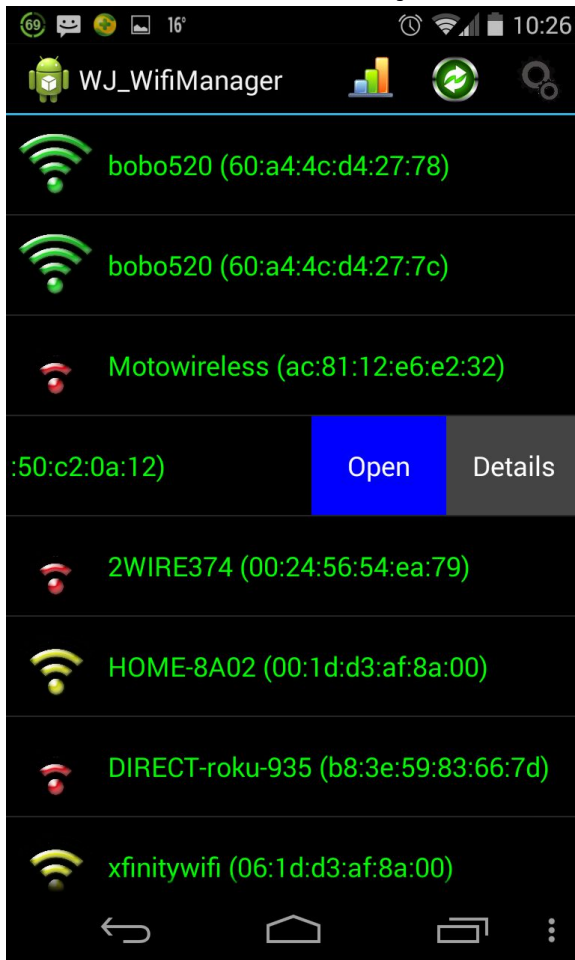

The Basic UI:

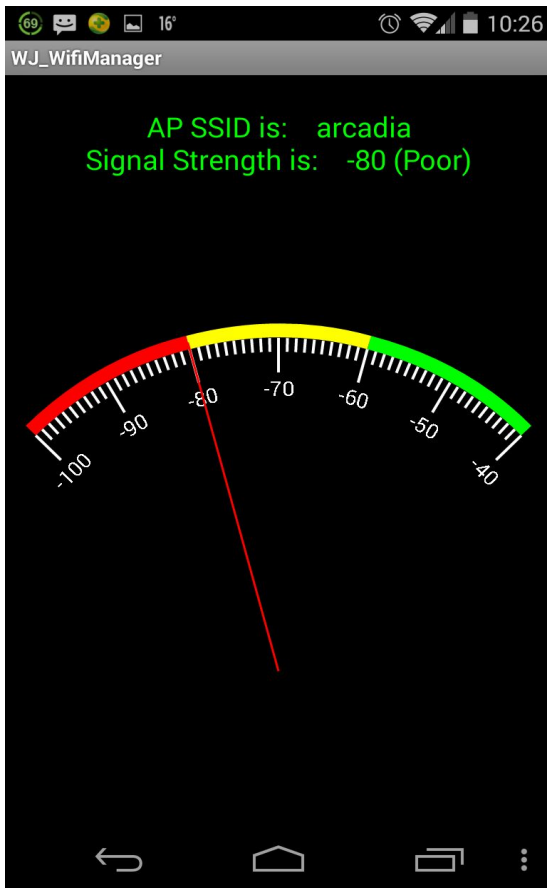

User can right swipe every item to get more information:

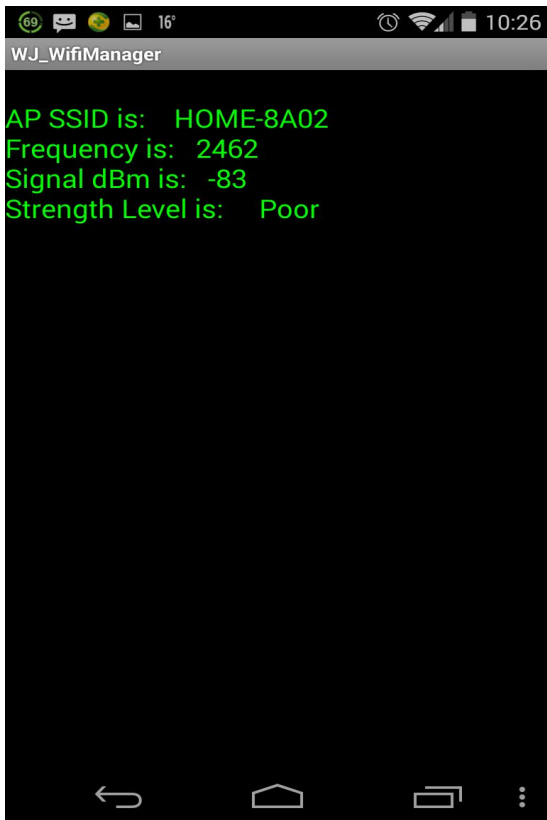

Open means to open the dynamic radar- like panel and details means go to the details

information. Both of them are dynamic.

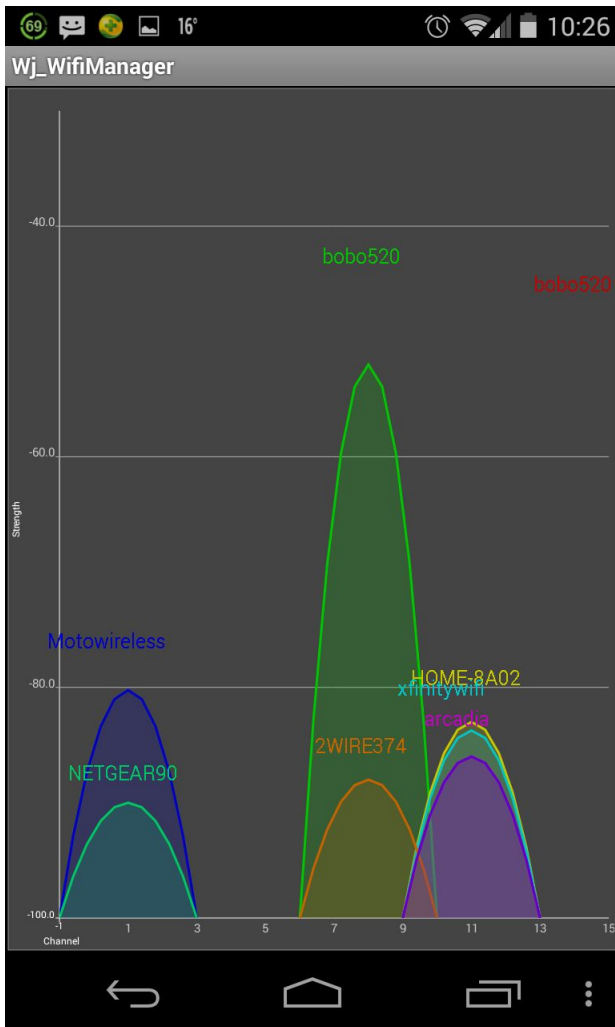

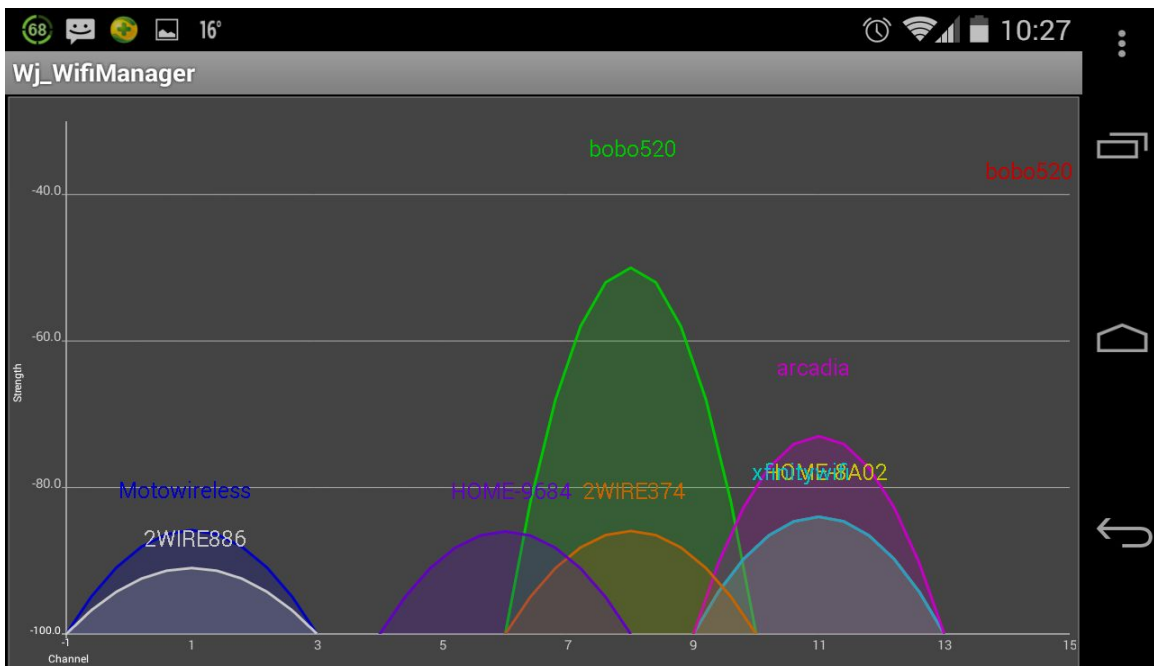

Dynamic Radar- like panel.

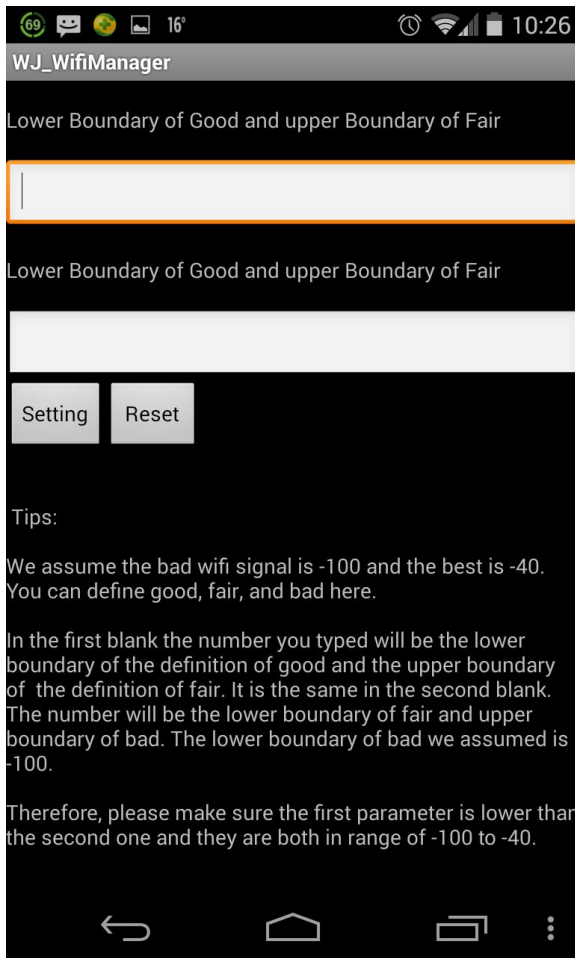

Dynamic Information details

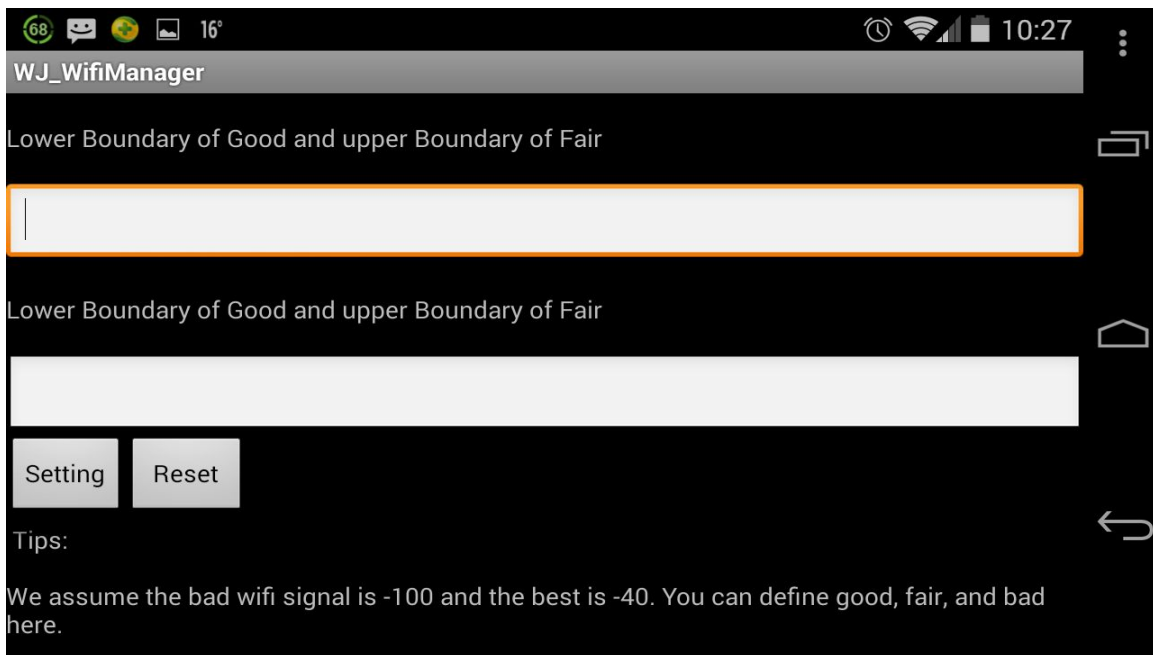

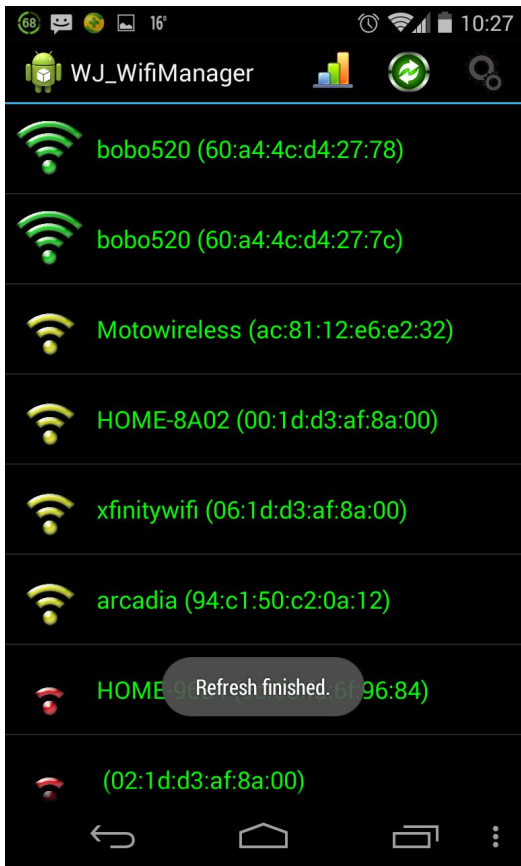

Dynamic Chart

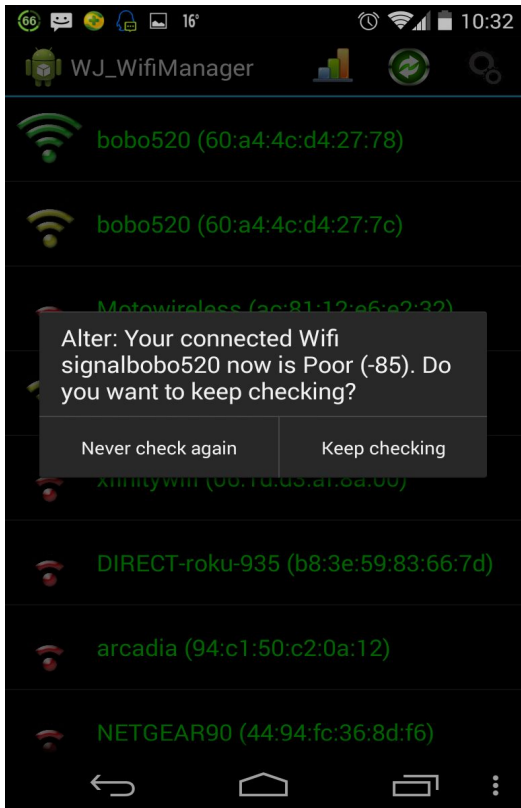

Parameter Settings and Reset

User can refresh the information by click Refresh Button

When the signal strength of the connected WIFI id down to the ranger of user- defined bad range, the app will make a warning.
